

AUSTRALIAN **GEOGRAPHY COMPETITION**

2025
Year 10

Instructions

Welcome to the 2025 Australian Geography Competition!

You have 30 minutes to complete 40 questions.

NOTE: Due to the size of some graphics, you may need to scroll down the page to see the complete graphic.

For some questions you can expand the size of the graphic by clicking the arrow in the centre of the page.

Question 1 of 40

Based on the animation, which of these statements is true?

- ☐ Global warming will reach 1.5° in September 2037.
- ☐ Global warming has decreased in recent years.
- ☐ Global temperature has been rising at a constant rate.
- ☐ Global temperature has been rising at an increasing rate.

Question 2 of 40

Global warming reached an estimated 1.26°C in December 2023. Using the graph, this calculation is based on:

- ☐ the average temperature in 2023
- ☐ the average temperature from 2013 to 2023
- ☐ the warming trend from 1993 to 2023
- ☐ the warming trend since the Industrial Revolution

Question 3 of 40 

Which key strategy could mitigate the global temperature rise in the next 10 years?

- ☐ deforestation to create more farmland
- ☐ closing nuclear power stations
- ☐ building more biomass-fuelled power stations
- ☐ increasing use of renewable energy

[◀ Back](#)Flag [Next ▶](#)Question 4 of 40 

Which of these are potential impacts of increasing temperature on Australia's ecosystems? Select all that apply.

- ☐ loss of biodiversity in sensitive areas
- ☐ coral bleaching in the Great Barrier Reef
- ☐ increased frequency of bushfires
- ☐ lower crop yields in all regions

[◀ Back](#)Flag [Next ▶](#)

Question 5 of 40

Correctly complete the sentence by choosing the terms from the drop-down menus.

Climate is the pattern of in a particular area.

forecast

recent

temperature

long-term

weather

temperature

wind

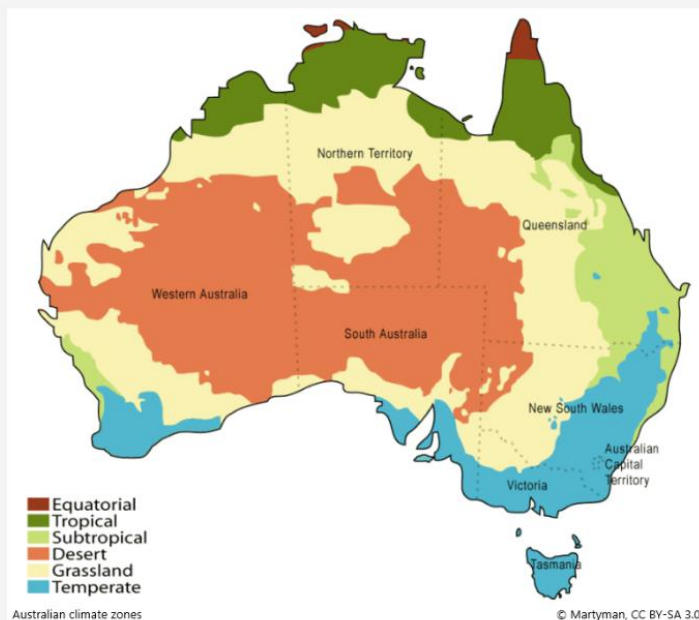

rain

Question 8 of 40

Drag a country name into the space to correctly complete the sentence.

Uganda
Chad
Mali
Egypt

Based on the scatterplot, had the highest mortality rate of children under 5.

Back

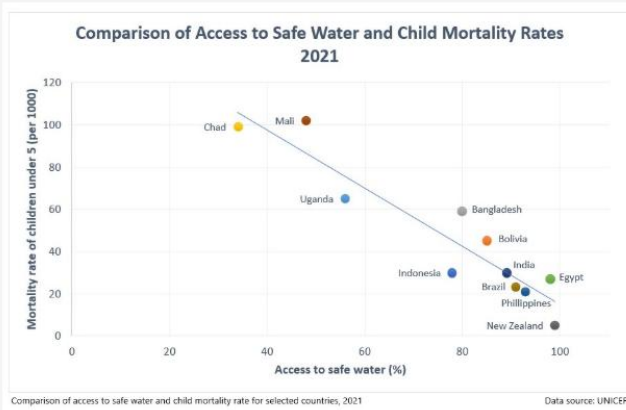

Flag

Next

Question 9 of 40

What relationship is evident between access to safe water and child mortality rates in the scatterplot?

- ☐ As access to safe water increases, child mortality decreases.
- ☐ As access to safe water increases, child mortality also increases.
- ☐ There is no relationship between access to safe water and child mortality rates.
- ☐ As access to safe water decreases, child mortality also decreases.

Back

Flag

Next

Question 10 of 40

Some countries have relatively high child mortality rates despite good access to safe water. Which statement best explains this phenomenon?

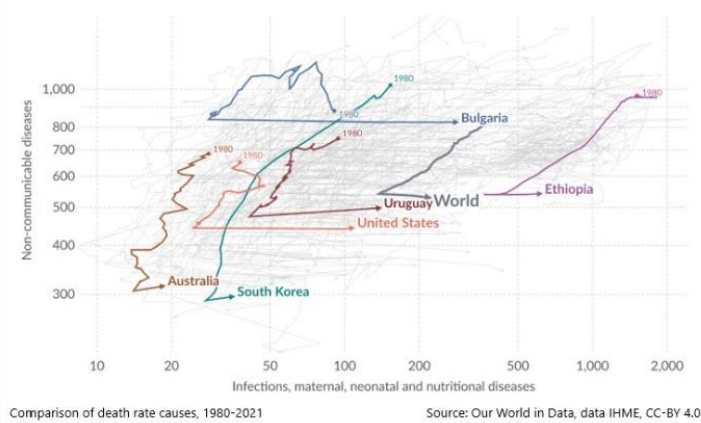

- ☐ Child mortality rates are affected by factors beyond safe water.
- ☐ Child mortality rates are unaffected by healthcare or living conditions.
- ☐ Countries with high safe water access always have the lowest child mortality rates.
- ☐ Safe water access is the only factor that affects child mortality rates.

Question 11 of 40

Drag a country name into the space to correctly complete the sentence.

Australia

Bulgaria

Ethiopia

United States

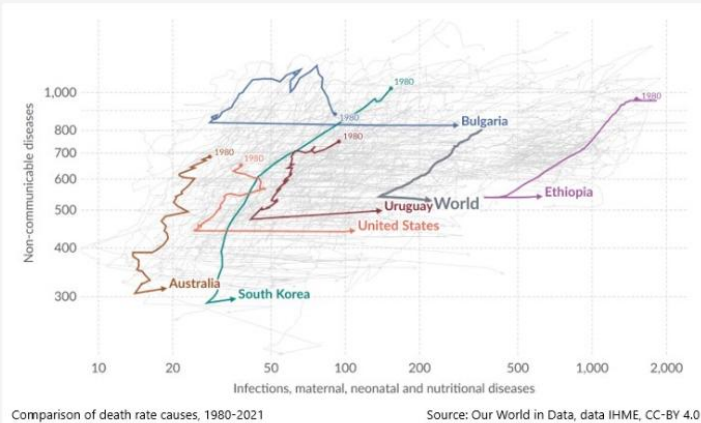

displays a death rate trend that significantly deviates from the patterns observed in the other highlighted countries in the graph.

Back

Flag

Next

Question 12 of 40

Based on the graph, what was the main cause of the change in Bulgaria's death rate during the 1980's?

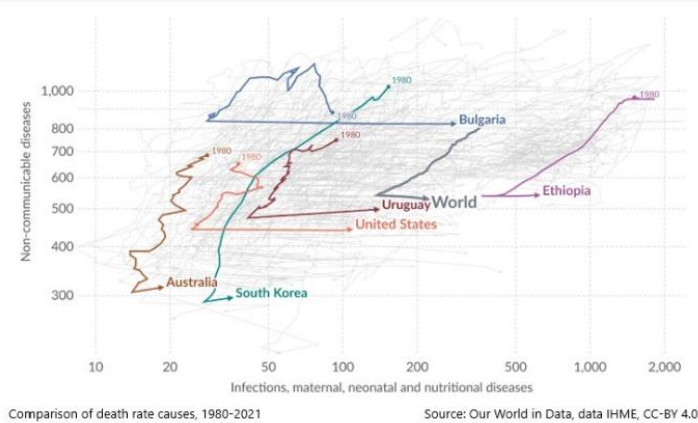

- ☐ cardiovascular diseases
- ☐ infant mortality
- ☐ HIV/AIDS
- ☐ COVID-19

Back

Flag

Next

Question 13 of 40

What is the most likely cause of the significant change in mortality patterns in 2019 to 2021, as shown in the graph?

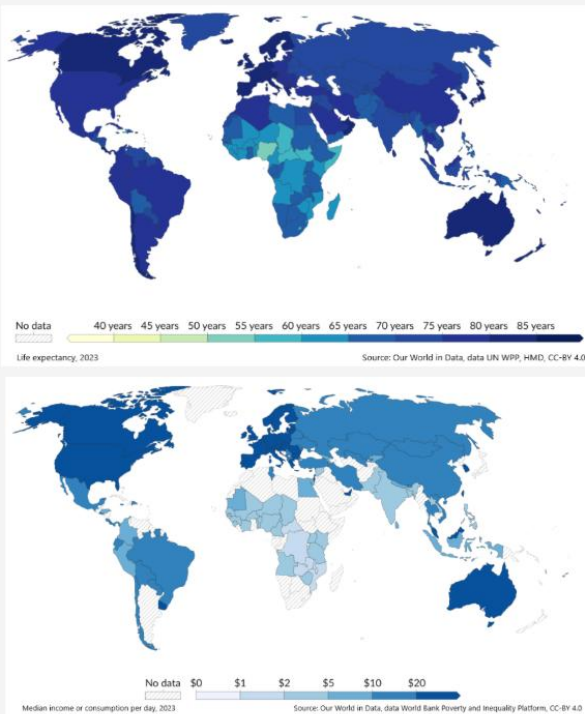

- ☐ COVID-19 pandemic
- ☐ poor health care
- ☐ high birth rate
- ☐ vaping

Question 16 of 40

No data 40 years 45 years 50 years 55 years 60 years 65 years 70 years 75 years 80 years 85 years
Life expectancy, 2023 Source: Our World in Data, data UN WPP, HMD, CC-BY 4.0

No data \$0 \$1 \$2 \$5 \$10 \$20
Median income or consumption per day, 2023 Source: Our World in Data, data World Bank Poverty and Inequality Platform, CC-BY 4.0

Many countries in Africa have low life expectancy and low median income per day. Which of these is the most likely reason for this relationship?

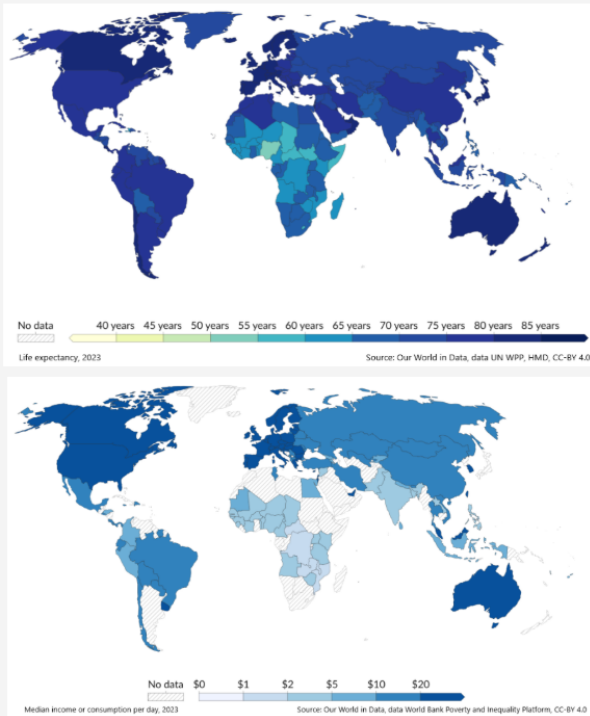

- ☐ high pollution affecting disease levels
- ☐ poor access to healthcare
- ☐ increased immigration to richer countries
- ☐ lack of technological advancements

Back

Flag

Next

Question 17 of 40

The **global** average life expectancy in 2023 was 73.2 years. How does the global average life expectancy in 2023 compare with the distribution of median income per day across countries?

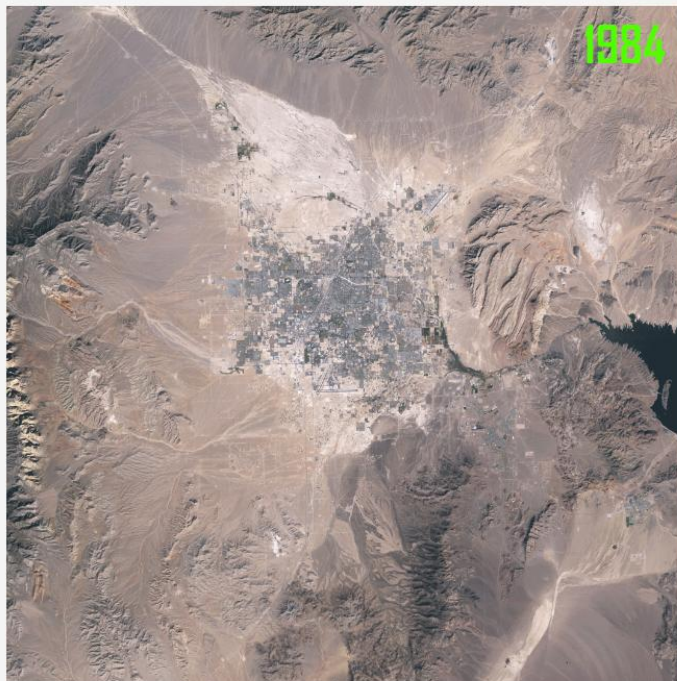

- ☐ Countries with life expectancy below the global average mostly have median incomes above \$10 per day.
- ☐ Countries with life expectancy above the global average mostly have median incomes below \$10 per day.
- ☐ There is no clear correlation between life expectancy and median income.
- ☐ Countries with life expectancy above the global average mostly have median incomes above \$10 per day.

Match the Earth systems most affected by these human practices by dragging the correct term into the table.

		atmosphere	biosphere	hemisphere	hydrosphere	lithosphere
Human practices	Earth system					
removal of trees that hold the soil together and protect the soil from washing away in the rain						
clearing rainforest and replanting it with palm oil plantations or other forms of monoculture						
fertilisers and pesticides used on farms washing into waterways						
burning of fossil fuels such as coal creating greenhouse gases and other pollutants						

Match the natural process with the images by selecting the correct process from the drop-down option on the right of the image.

Question 23 of 40

Which of the following best explains how cultural values influence the way First Nations Australians manage environments? Select all that apply.

☐ using water resources according to lore

☐ economic development is prioritised over conservation

☐ sustainable care for the environment is central

☐ private land ownership is preferred

Back

Flag 

Next

Question 24 of 40

Match the definitions in the table with the terms that best fit, and add **one** example of each type of environmental resource. Drag your answers into the table.

renewable

non-renewable

continuous

wind

oil

forests

geothermal

gold

clean air

Definition	Term	Example
resources whose availability is unaffected by their use by humans		
resources which are, or can be, replenished within a relatively short time		
resources whose exploitation can lead to their exhaustion

Question 25 of 40 

What is a valid reason for Qatar having the largest ecological footprint per person?

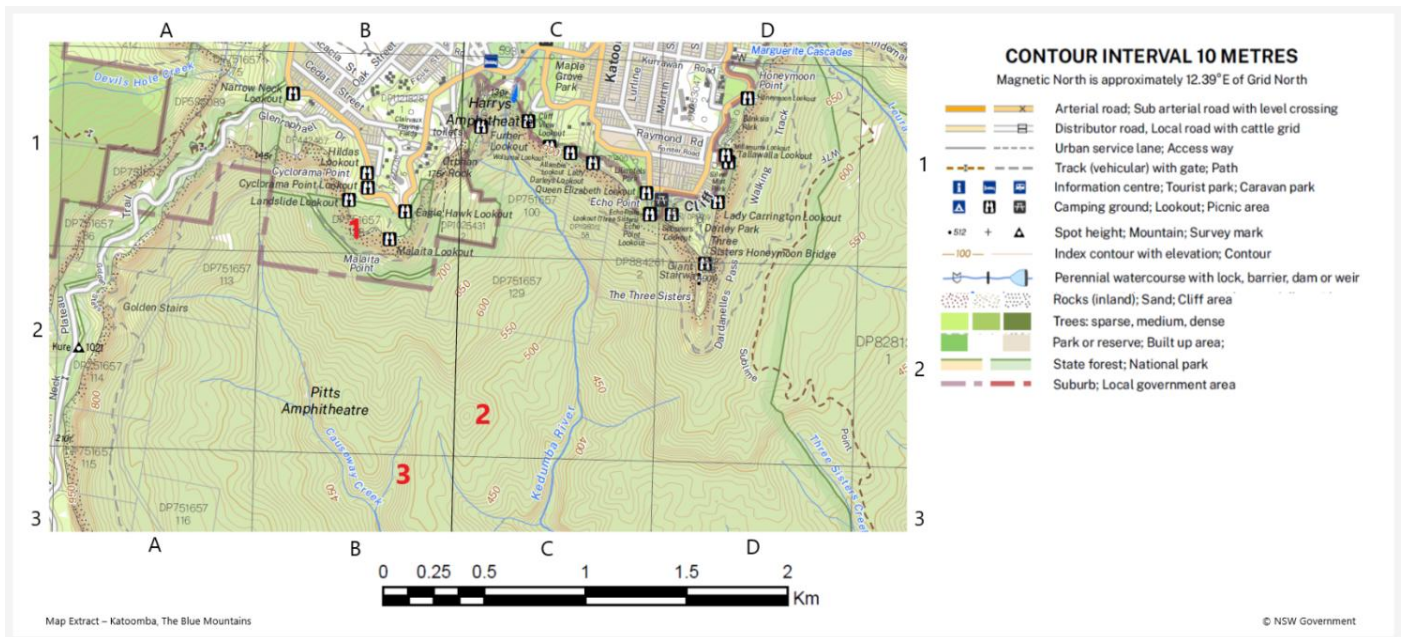

- ☐ large population size
- ☐ high energy consumption
- ☐ lack of urban development
- ☐ extensive forest cover

[< Back](#)Flag [Next >](#)Question 26 of 40 

Which impact would rising ecological footprints in countries like Australia and the USA have on global sustainability efforts?

- ☐ increased efforts by other countries to plant forests to offset their footprints
- ☐ reduced global energy demand from increasing consumption
- ☐ more strain on global resources, complicating sustainability goals
- ☐ little effect on global sustainability as these countries use renewable energy

Question 29 of 40

You may use the on-screen ruler - click on the symbol in the top right corner, drag and rotate it.

Using the map, what is the approximate direct distance between Eagle Hawk Lookout (B1) and Honeymoon Lookout (D1)?

- ☐ 1.75km
- ☐ 2km
- ☐ 3.5km
- ☐ 7km

Back

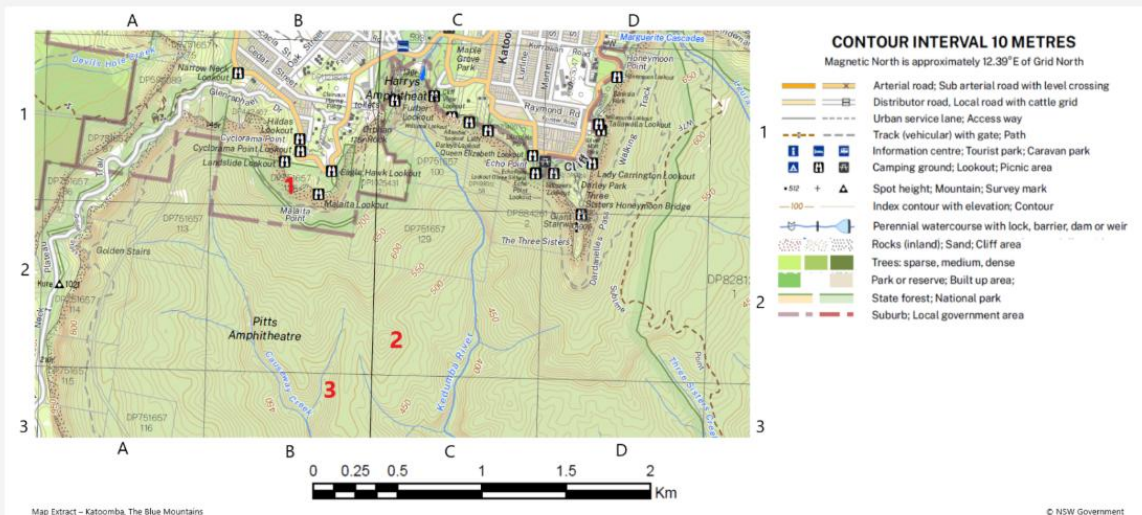

Flag

Next

Question 30 of 40

What would be the best mode of transport to move between Golden Stairs (A2) and Cyclorama Point Lookout (B1) using the shortest route?

- ☐ car
- ☐ motorcycle
- ☐ walk
- ☐ kayak

Back

Flag

Next

Question 31 of 40

Match each of the statements below with the value they represent by dragging the term into the table.

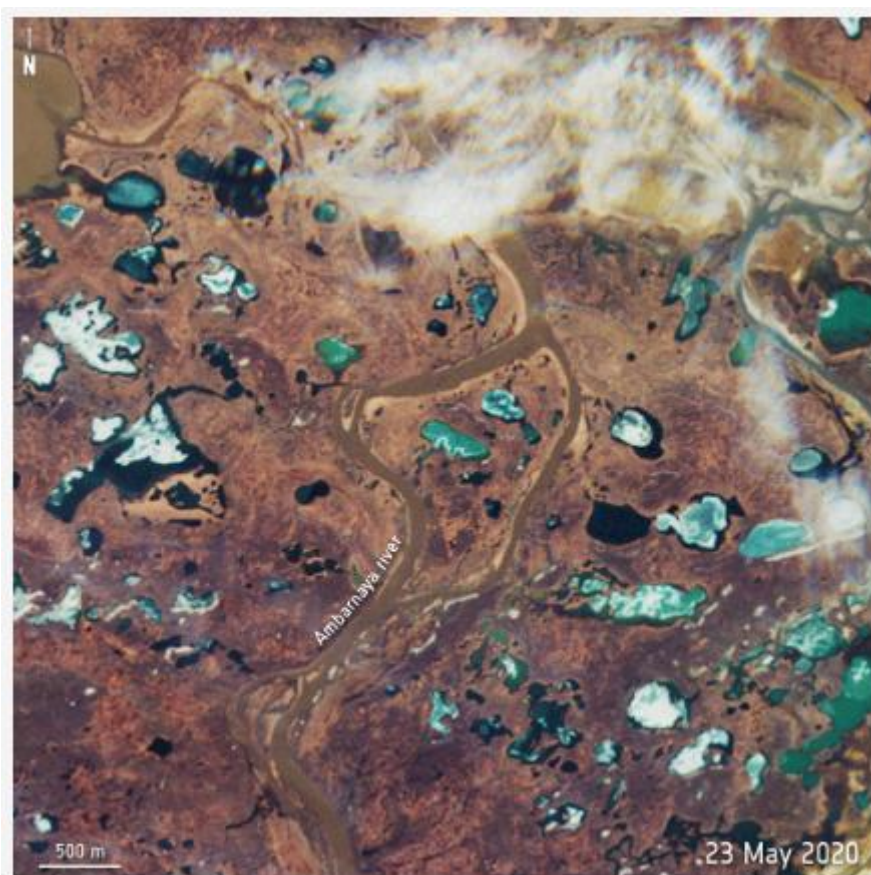

aesthetic cultural economic environmental spiritual

Statement	Value
The estimated tourism output in the Blue Mountains is \$385 million and it provides approximately 1,900 local jobs.	
The importance of the Blue Mountains has been recognised by the famous bush poet Henry Lawson in his poem published in 1888.	
The Three Sisters is a famous landform located in the Blue Mountains. Thousands of visitors stop by to admire its beauty.	
The Blue Mountains area spans the traditional Country of the Darkinjung, Dharawal, Dharug, Gundungurra, Wiradjuri and Wonnarua Aboriginal peoples, whose traditional beliefs connect them with the landscape.	
The Blue Mountains area includes an outstanding diversity of habitats and plant communities that support its globally significant species and ecosystem diversity (c. 1,500 species).

Using the two graphics, in which region of the world did this occur?

- ☐ tropical zone
- ☐ polar zone
- ☐ temperate zone
- ☐ equatorial zone

Back

Flag

Next

Question 34 of 40

Area near Norilsk, Russia

© ESA

Which of these impacts could occur as a result of this environmental issue? Select all those that apply.

- ☐ increased warmth of water supply
- ☐ bird and mammal mortality
- ☐ increased river erosion
- ☐ bans on fishing

Back

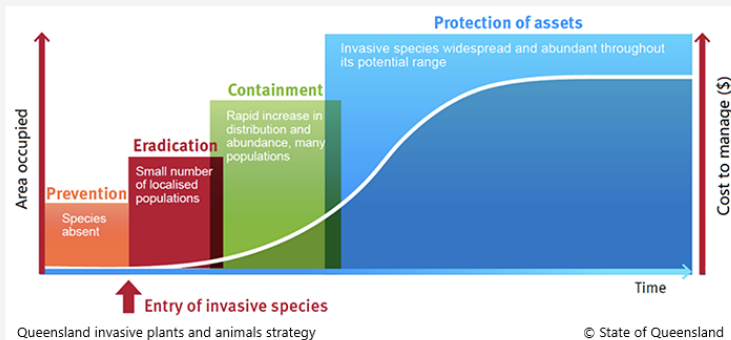

Flag

Next

Question 35 of 40

Which of these methods of managing invasive species is an example of prevention?

- ☐ limit the invasive species to a specific area
- ☐ control the import of invasive species
- ☐ increase public education in identifying invasive species
- ☐ fencing, trapping and poisoning invasive species

Back

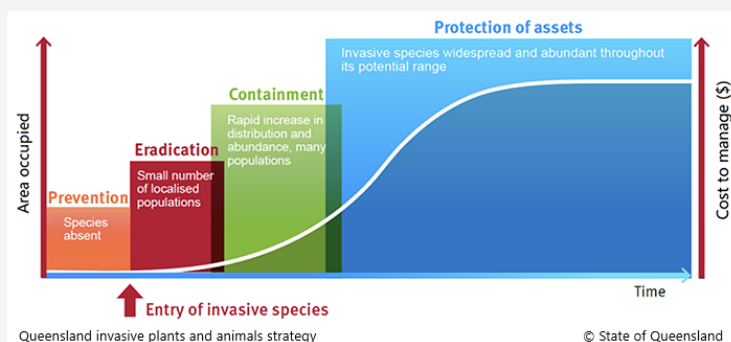

Flag

Next

Question 36 of 40

Using the data on the graph, identify which of these statements is true.

- ☐ eradication is effective when invasive species are widespread
- ☐ the most cost-effective method of managing invasive species is containment
- ☐ after entry, the area occupied by invasive species can grow exponentially over time
- ☐ the cost of preventing the entry of invasive species is greater than the cost of protecting assets from invasive species

Flag

Next

Question 37 of 40

Using the graphs, which of the following statements is most likely to be true?

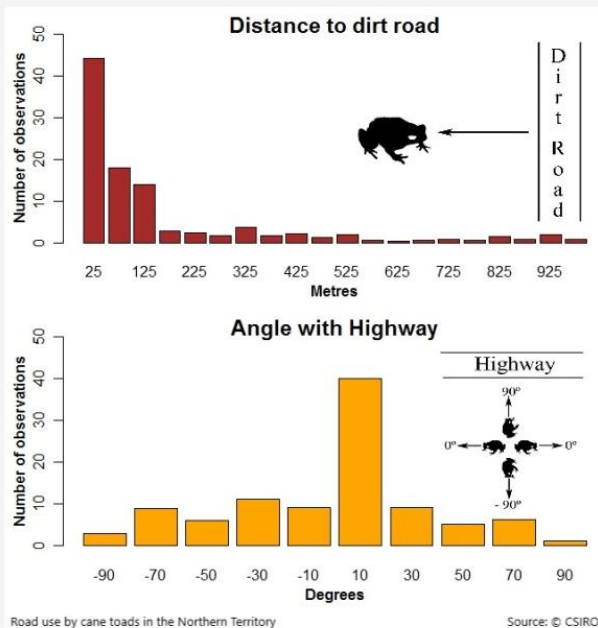

- ☐ Cane toads most commonly move along roads.
- ☐ Cane toads most commonly move parallel to dirt roads but at a considerable distance away from them.
- ☐ Cane toads are most commonly observed crossing roads.
- ☐ Cane toads avoid dirt roads when moving through the bush.

Back

Flag

Next

Question 38 of 40

What would have been the most appropriate method to collect the data shown in the top graph?

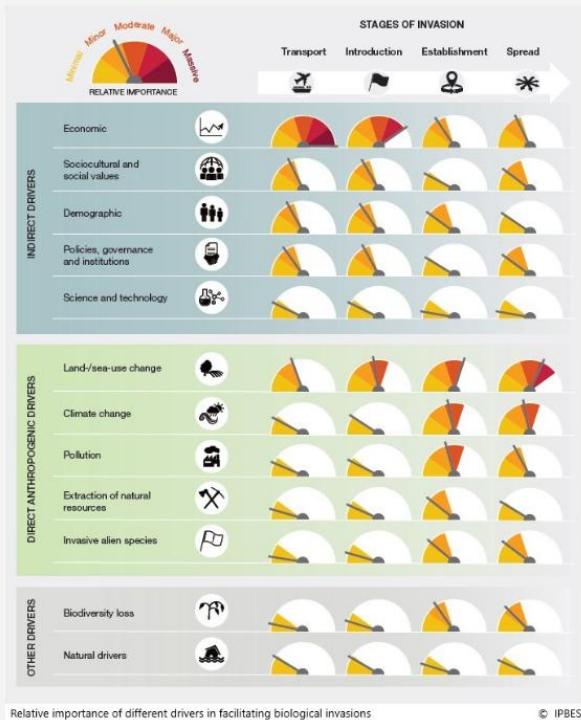

- ☐ Radio track cane toads to determine their location and movement.
- ☐ Use observations of the location of cane toads made by the public.
- ☐ Count the number of cane toads killed on roads.
- ☐ Count the number of cane toads in quadrats across a sample area.

Flag

Next

Question 39 of 40

Complete the sentence by dragging and dropping the two correct answers into the spaces.

economic
land/sea use change
pollution

climate change
invasive alien species

The two most important direct anthropogenic drivers facilitating the invasion of alien species are and .

Back

Flag

Next

Question 40 of 40

Which of these reasons explain how climate change may aid in the invasion of species? Select all that apply.

- ☐ Climate change reduces the levels of carbon dioxide in the air affecting habitats of native species.
- ☐ Changes in temperature and precipitation may extend the areas that are suitable for invasive species.
- ☐ Extreme climatic events such as cyclones can damage ecosystems providing opportunities for invasive species.
- ☐ Climate change may disrupt reproduction of invasive species.
