

Worksheets

Chemistry

Total questions: 16

Worksheet time: 25mins

Name

Class

Date

1. How is the periodic table of elements arranged?

(a) _____

Ans. _____

2. The atomic number gives us

a) protons

b) electrons

c) mass

d) neutrons

e) nucleus

3. Match the following

valence electron ⦿

⦿ lives in the nucleus & positively charge

electron ⦿

⦿ lives in the cloud & negatively charge

nucleus ⦿

⦿ lives in the nucleus & no charge

proton ⦿

⦿ lives in the last ring & negatively charge

neutron ⦿

⦿ where protons & neutrons are found and largest mass

4. Label the correct subatomic particles

proton

electron

neutron

a)

b)

c)

5. Label the metals, nonmetals and metalloids

metals

nonmetals

metalloids

metals

Periodic Table of the Elements

a)

b)

c)

d)

6. Match the following

metals ⌵	⌵ characteristics of both metals and nonmetals
groups/family ⌵	⌵ generally shiny, malleable, ductile, and good conductors of heat and electricity
nonmetals ⌵	⌵ generally dull, brittle, and poor conductors of heat and electricity
period ⌵	⌵ vertical columns on the Periodic Table that contain elements with similar properties
metalloids ⌵	⌵ the horizontal rows of elements on the Periodic Table

7. Describe TWO things that the groups/families lets us know about the elements.

8. How many periods does the periodic table have AND what do each period tell us about the elements?

9. Valence electrons live in the (a) _____ ring of the atomic structure. It tells us how (b) _____ the elements are. Group 1 are the (c) _____ whereas group 18 are the (d) _____

Choose from the below words

outermost

reactive

most reactive

least reactive

innermost

10. Identify which are the products and reactants

products

reactants

a)

b)

11. The Law of Conservation of Mass states that

- a) compounds and elements are the same b) elements can be destroyed
c) matter cannot be created or destroyed, but can be transformed d) mass is the same for all the objects if they need to exist

12.

This change is a

- a) chemical reaction
- b) physical change
- c) musical change
- d) Ice Ice baby

13. **How is a chemical change different from a physical change?**

- a) there is no difference
- b) a physical change creates a new substance
- c) a chemical change creates a new substance

14. Is burning wood a chemical or physical change?

- a) chemical
- b) physical

15. Is glass breaking a chemical or physical change?

- a) chemical
- b) physical

16.

A white tablet is dropped into water. The water becomes cloudy and bubbles are produced. What type of change has occurred?

- a) Physical change
- b) Chemical change
- c) No change
